

## 1.4. What is the manufacturing tonnage for the site?

### Standard

What is the manufacturing tonnage for the past 12 months?

*Manufacturing tonnages can be substantiated in any way agreed to between the auditor and the auditee (e.g. production printouts) as long as proof is provided. A legitimate figure must be recorded. This is a moderate NC if not provided.*

### Purpose

To give SFMCA the ability to understand what is being produced.

### Reason

From an industry perspective it is important to know what the industry is producing when meeting with politicians and livestock industries.

### What is Acceptable?

The manufacturing tonnages are for the previous 12 months and covers all products produced that are covered by FeedSafe.

When calculating the tonnages it must be from the day prior to the audit and for the 12 months previous. For example, if the audit date is on the 12 October 2024, the period will be from the 12 October 2023 to 11 October 2024.

All measurements must be in tonnes and not kilograms.
